

Proof based service delivery, helped Fearless in meeting bank's needs for audit compliance

Fearless was looking for patrolling solution, which provides irrefutable evidence of all patrolling visits at bank branches. On top of this core requirement, they have couple of more preferences. On one hand, system should be user-friendly due to limited literacy of security guards and on the other hand, it should cater for patchy internet coverage.

Initially, Workmatec proposed standard patrolling solution to Fearless and over a period of couple months it was customized to meet said peculiar needs.

- ✓ **Geofencing:** Restricts patrolling duty submission within the virtual boundaries of the particular bank branches.
- ✓ **Proof of Delivery:** Selfie of the guard is submitted with duties to substantiate precise location of check post. Please note that attachment is not allowed as it can be used to fake submission.

- ✓ **Offline:** Guard App keeps functioning without internet and on availability of internet, synch back to cloud.

- ✓ **User-friendly:** Intuitive layout of mobile app with distinct colors and feature of attaching voice clips makes it easy for security guards to operate.

- ✓ **Cloud Date-Time Stamp:**

Whenever duty is submitted to cloud and if there is a mismatch in Date/time between App and Cloud then user is advised to change the settings.
